

# Pi-hole Wizard Screenshot Checklist

README Documentation

## 1 Wizard Flow

1. **Prerequisites Check** – Showing pass/fail indicators with green checkmarks
2. **Deployment Type Selection** – Docker option selected with “Recommended” badge
3. **Network Configuration** – With auto-detected IP address displayed
4. **DNS Configuration** – Showing Unbound toggle and community blocklist options
5. **DHCP Configuration** – Page with warning box visible
6. **Security Page** – Password input fields
7. **Review Page** – Showing config preview tabs with copy button

## 2 Key Features

8. **Tooltip Hover** – Hovering over “DHCP”, “Unbound”, or “DNS” showing explanation
9. **Copy Button State** – Showing “Copied!” feedback with checkmark
10. **Theme Toggle** – Dark mode vs Light mode (side by side or both versions)
11. **AI Chat Sidebar** – Sidebar open with quick prompt buttons visible
12. **Success Screen** – With confetti animation and donation prompt

## 3 Optional Screenshots

13. **Mobile View** – Browser resized to narrow width
14. **Update Modal** – Update check dialog open
15. **Loading State** – Spinner overlay during operation

## 4 Priority Shots for Clean README

**Recommended minimum:** Screenshots #1, #4, #7, #8, #10, #12

These showcase the core wizard flow and polish features.

## 5 Screenshot Tips

- Use a clean browser window (no bookmarks bar, extensions hidden)
- Capture at consistent window size (e.g., 1280x800)
- For tooltips, use a screenshot tool with delay to capture hover state
- Consider using a GIF for the confetti animation
- Name files descriptively: 01-prerequisites.png, 04-dns-config.png, etc.
